# Jabber "QuadPod" Masts

## High Grade Galvanized Steel

### Specifications

Jabber QuadPod Masts are made of 6 to 8 sections (depending on size). Each section of the mast has a 1mm wall thickness, they lock into place with metal locking mast clamps (supplied).

These masts are manufactured from galvanised steel, very hard wearing and built for extreme / military use. They are very substantial, yet designed to be installed by 1 person.

These 4 legged tripods ("Quadpods") do not need to be guyed. They are fitted with 4 legs creating a stable base. Each foot has a hole for pegging or bolting.

Maximum weight load 10kg.

### CPR Regulations

Under the CPR (Construction Products Regulation, EU 305/2011), CE marking is only required where:

- The construction product is intended to be permanently incorporated into a building or civil engineering works and
- Where there is an applicable harmonized European Standard (hEN) covering the construction product.

The masts supplied by Jabber Products Limited are temporary products as they are not permanently incorporated into buildings or civil engineering works nor are there any standards (hEN's) applicable to these products and therefore CE Marking is not required.

Certain construction products manufactured from steel are within the scope of CE marking under the CPR but the scope of these standards does not cover the extendable masts supplied by Jabber Products Ltd.

### Info and Shipping

Our Telescopic Masts are built and manufactured to our specification, because after 40 years experience in radio we could not find a suitable, heavy duty, high quality masts at reasonable prices.

We supply private and trade with our UK stock. We also supply similar products, such as our Jabber Telescopic Masts, and our Lattice Towers.

Please note: These masts are delivered in a canvas shipping bag. These are lightweight cloth bags to protect the couriers hands in shipping only. These bags are not intended for storage or further shipping of mast. Please recycle.

We can ship to Europe and Worldwide. Contact us for shipping prices.
